ZipMagic® 2000

THE ZIP UTILITY FOR THE NEW MILLENNIUM

Here's what the experts say about ZipMagic:

★★★★★

ZDNet, July 1997

"...the most impressively designed and executed utility I've seen this year."

-Windows Magazine, September 1998

"...the most innovative Zip utility reviewed here."

-PC Magazine, March 1998

"...the Mercedes of Zip programs -- it definitely merits a test ride."

-ZDNet Software Library, May 6, 1998

"ZipMagic is not only the most powerful .zip archive manager ever written, it's also the easiest to use."

-PC Magazine Online, August 1997

"If you try this superb utility, chances are you'll buy it on the spot, and soon you'll wonder how you ever got by without it."

-James Coates, Chicago Tribune, May 17, 1998

"In the world of Zip, the one clear winner is ZipMagic..."

-Laptop Buyer's Guide and Handbook, September 1998

"...one of the easiest to use and most comprehensive utilities on the market today."

-Computer Times, November 1998

All press quotes and awards refer to prior versions of ZipMagic.

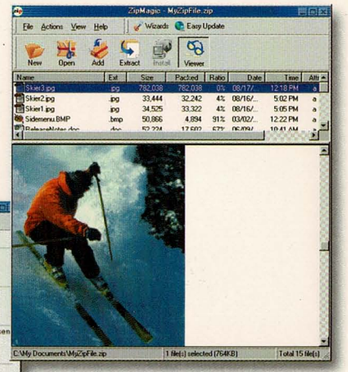
Use Zip files without unzipping them first!

With its patented *ZipFolders*® technology, ZipMagic makes your Zip files look and act like ordinary folders! Open and access the contents of Zip files right in Windows Explorer. And since ZipMagic unzips and zips invisibly, in the background, you can open, modify, and save documents within Zip files just like regular files. You can even run many programs from a Zip file!

Wizards make it even easier.

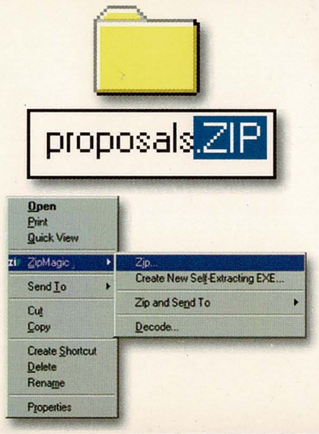
Confused? Use ZipMagic's wizards for step-by-step help with zipping and unzipping.

ZipMagic's easy-to-use wizards simplify unzipping, zipping, creating self-extracting Zips and more.



*Use the **ZipWindow**™ to zip, unzip, open several types of non-Zip compressed files, and preview a wide variety of graphics inside of zipped files — all from one location.*

ZipMagic® 2000 takes the hassle out of Zip files!



Seamless integration with Windows Explorer.

Add ".ZIP" to a folder's name and ZipMagic automatically compresses everything inside; to instantly unzip the file, just remove the ".ZIP" extension. And if you want more Zip options at your fingertips, ZipMagic's most popular features are integrated right into Windows Explorer's file menus!

ZipMagic® outzips the competition!

"Goodbye WinZip and hello ZipMagic."
–Computer Currents, August 1997

"Zip-It ... offers far less power and flexibility than Mijenix's ZipMagic."
–PC Magazine, March 1998

"I have long been a fan of WinZip; now it looks like I'll be a convert to ZipMagic."
–Jerry Pournelle, BYTE Magazine, March 1998

"With PKZip, we would have had to make several Zip files...It would have been a nightmare without ZipMagic."
–PC Upgrade Magazine

"Watch out WinZip – ZipMagic has arrived!"
–Stroud's Reviews, July 12,1999

"Several companies have attempted to put a pretty face on Zip archives, (but) none does what ZipMagic does."
–The Des Moines Register, June 23, 1997

"...other packages seem terribly clumsy after you've tried ZipMagic."
–EDN Magazine

**Zip&Mail™ wizard and "Zip and Send to" work with most popular email programs. Email plug-in works with Eudora Light and Pro 3.0 & 4.0, Microsoft Inbox, Exchange and Outlook 97, 98 & 2000.*

SLASH ONLINE HASSLES!

Internet download help!

DownloadMagic™ lets you start and stop downloads while online, or often recover from interrupted downloads.

Zip and email files quickly and easily!

Use the *Zip&Mail*™ wizard to zip and attach files to a new email message. In a hurry? Click on any file in *Windows Explorer*, choose "*Zip and Send to*™" and ZipMagic zips it and attaches it to your new mail message*.

Use the email plug-in!

ZipMagic adds a special Zip plug-in to Outlook and Eudora, to zip and attach files without leaving your email program.

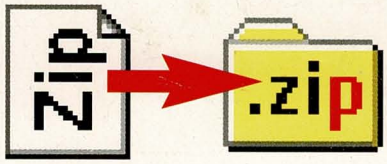
"Two Thumbs Up"

–Windows Magazine, September 1998

Nowadays, it seems you can hardly turn on your computer without running into a compressed ".ZIP" file. But just using Zip files can be a pain, often requiring a separate utility to "unzip" the file. Wouldn't it be nice if you could wave a magic wand and make unzipping hassles disappear forever? Now you can, with ZipMagic 2000.

Open sesame! Use Zip files WITHOUT unzipping!

The sorcery behind ZipMagic® 2000 is our patented *ZipFolders®* technology. It makes your compressed Zip files look and act like *regular Windows folders!* So instead of launching a separate utility to see what's inside a Zip file, just open it like any other Windows folder. And since ZipMagic unzips and zips invisibly, in the background, you can open, modify, and save documents within Zip files as if they were regular files. You can even run many programs from inside a Zip file!



ZipMagic 2000 makes your Zip files look and act like regular Windows folders!

Simple wizards lead the way!

Confused about Zip files? ZipMagic's easy-to-use wizards lead you step-by-step through several zip actions, like zipping and unzipping and making self-extracting Zip files.

No mystery here – ZipMagic also opens non-Zip compression files.

Nothing's more frustrating than waiting for a download, only to find out it's compressed in a "mystery" format your Zip utility can't open. No problem – ZipMagic can open several types of non-Zip compressed files, like ARJ, LZH, and RAR.

View graphics files without opening their applications!

ZipMagic also features a built-in viewer that previews many types of graphics inside Zip files! Save time by browsing through the contents of Zip files to find the file you really want.

Easy backups!

The *Zip&Backup™* wizard makes it easy to zip and back up data to removable disks or another hard drive. Simply select the files to back up and their destination, and save the backup settings for next time.

Take the hassle out of really BIG Zip files.

You want to give a Zip file to a friend, but it's too big to fit on one floppy disk – ZipMagic makes it easy since it can automatically "span" your Zip file over multiple disks.

Create self-extracting Zip files for easy distribution.

With ZipMagic, you can make "self-extracting" Zip files – perfect for sending a Zip file to someone who doesn't have a Zip utility. Plus, you can customize these files with your own custom program icon, add comments, span the file over multiple diskettes, or split the self-extracting file into pre-defined sizes.

Send and receive files over email with ease.

Emailing a big file to someone? Use the *Zip&Mail™* wizard to zip files and then automatically attach them to a new message with most popular email programs. And there's even an email plug-in included for current versions of Eudora and Outlook, so you can zip and attach files from within your email program. Receiving files is easier, too – use the email attachment decoder to unscramble several types of "garbled" emails.

Restart failed downloads.

Have you ever had a big Internet download fail when it was almost finished? *DownloadMagic™* can often restart a download *at the point where it left off*, such as when you lose your connection. You can also stop and restart downloads while online.

Virus and security options.

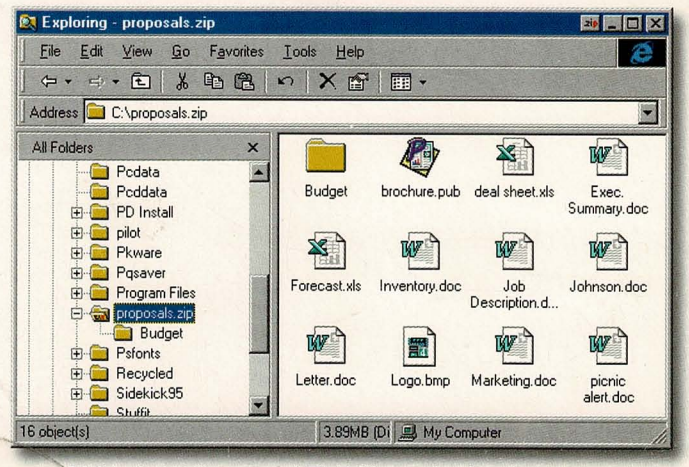
Zip files may contain virus-infected files, so you can configure ZipMagic to have your antivirus program scan a zipped file (works with Fix-It Utilities 99, Norton Antivirus, McAfee ViruScan and others). And ZipMagic doesn't just help protect your system from viruses; it can also password-encrypt sensitive Zip files to resist prying eyes.

Power to the Power User.

Power users, with our Windows command line option (accessible in a Windows DOS box), you can perform tasks like spanning, creating self-extracting Zips, updating, and password-protecting zip files. There's even a standalone DOS command line version for basic zipping and unzipping.

Get ZipMagic RISK FREE!

InfoWorld called the first version of ZipMagic "as perfect a utility as I've ever found!" – and it's even better now! We're so sure you'll agree, we offer an unconditional 60-day money-back guarantee. You have nothing to lose but Zip hassles – get ZipMagic today!



*ZipMagic 2000's patented **ZipFolders** technology lets you open Zip files just like folders, right from Windows. Open and modify files and launch many applications inside Zip files without unzipping first!*
